

TECHNICAL DATA SHEET

PRODUCT NAME – ONYFLOW D925

Description:-

ONYFLOW D925 is a Fuel Booster & is Fuel Additive, able to increase dramatically the fuel effectiveness for Engine. These additive increases the cetane number by 4-6 unit and improves the combustion of fuel in Engine hence improves gas mileage by 7-10 %. It Cleans and protects diesel fuel pump and injector. It improves the longevity of vehicle's diesel injection system. It acts as a buffer along with pipe. It contains lubricity enhancers, so capable of lubricating all vital components, including pumps, cylinder walls, and injectors, hence it increases life span of Engine. It also prevents fuel system from rust and clean intake valve deposits. It brings reasonable improvement in horsepower and fuel economy rates. It helps in better atomization thus increases fuel efficiency in fuel injection. It's compatible with different emission system. It helps to remove built-up carbon and dirt deposits from the engine's moving part. It is ecofriendly, reduce the emission of carbon monoxide, and Nitrogen oxide(NOx) so helps in reducing harmful tailpipe emission from motor vehicles.

Typical properties:-

ONYFLOW	ONYFLOW D925
COLOUR/ APPEARANCE	PALE YELLOW TO AMBER LIQUID
DENSITY @25°C (ASTM D 298)	0.96-0.99
VISCOSITY (cst @ 40° C) (ASTM D445)	12-18
REFRACTIVE INDEX	1.505-1.560

Typical dosage in Diesel fuel:

Recommended dosage is 800 ppm to 1200 ppm.

Depends upon on the Nature and type of Diesel Engine.

Packing :-

180 KG drum/ ISO Container

Compatibility:

They are designed for use in blending readily/ directly with Diesel fuel.

Production capacity:-

ONNYYXX PETROCHEM have present capacity of 12000 mt/annum, and soon we are going for expansion.

INDIA | UAE | USA
