

**TECHNICAL DATA SHEET**

**PRODUCT NAME – ONYFLOW P930**

**Description:-**

*ONYFLOW P930 is a fuel Booster is a Fuel additive, able to increase dramatically the fuel effectiveness of Engine.*

*In case of Petro Engine, it helps in improving Octant Number of fuel, by oxygenate to raise the gasoline ON. Oxygen helps gasoline burn more completely and reducing harmful tailpipe emissions from motor vehicles. It helps to remove built-up carbon and dirt deposits from the engine's moving parts. The experimental application shows, it can actually improve the Engine performance by up to 7-8 percent.*

*It Contains lubricity enhancers, so capable of lubricating all vital components, including pumps, cylinder walls and injectors, hence increase life span of Engine. It also Prevents fuel system from rust and cleans intake valve deposits. It brings reasonable improvement in horsepower and fuel economy rates. It is compatible with different emissions systems. It works ecofriendly; reduce the emission of Carbon monoxide, CO2 and NOx, reducing harmful tailpipe emissions from motor vehicles.*

**Typical properties:-**

ONYFLOW	ONYFLOW P930
COLOUR/ APPEARANCE	PALE YELLOW TO AMBER LIQUID
DENSITY @25°C ( ASTM D 298)	0.96-0.99
VISCOSITY ( cst @ 40° C) (ASTM D445)	12-18
REFRACTIVE INDEX	1.505-1.560

**Typical dosage in Diesel fuel:-**

Recommended dosage is 800 ppm to 1200 ppm.

\*Depends upon on the Nature and type of Engine.

**Packing :-**

180 KG drum / ISO Container.

**Compatibility:**

They are designed for use in blending readily/ directly with Petrol.

**Production capacity:-**

Onnyxx Petrochem have present capacity of 9000 mt/annum.
